**Definitions:**

- Forestland—Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.
- Number of all live trees (or trees)—Number of live trees at least 1 inch diameter at breast height or diameter at root collar.
- Volume of all live (or volume)—Net volume of wood in the central stem of live trees 5.0 inches diameter or larger from a 1 -foot height stump to a minimum 4-inch top diameter outside bark, or to where the central stem breaks into limbs all of which are less than 4.0 inches diameter outside bark. Specifications differ for woodland species.
- All live aboveground biomass (or biomass)—Aboveground dry weight of live trees 1.0 inches diameter or larger, including all tops and limbs, and stump, but excluding foliage.
- Per acre estimates in the appendix are per acre of forestland.

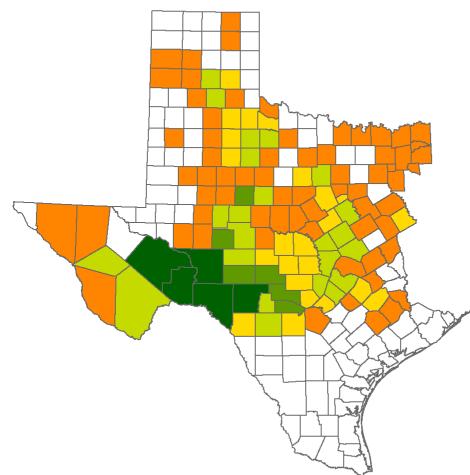

**Notes:**

- Estimates are given by county in the figures and tables. Estimates are based on a sample and are therefore subject to sampling error. Sampling errors may be high for individual counties.
- Inventory estimates are from FIADB loaded to the FIA DataMart (<http://apps.fs.fed.us/fiadb-downloads/datamart.html>) on 13 September 2017.

<sup>A</sup> Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

<sup>B</sup> Number of live trees with a minimum diameter of 1 inch.

<sup>C</sup> Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

<sup>D</sup> Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

<sup>A</sup> Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

<sup>B</sup> Number of live trees with a minimum diameter of 1 inch.

<sup>C</sup> Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

<sup>D</sup> Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

<sup>A</sup> Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

<sup>B</sup> Number of live trees with a minimum diameter of 1 inch.

<sup>C</sup> Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

<sup>D</sup> Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.

<sup>A</sup> Land with at least 10 percent cover by live trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

<sup>B</sup> Number of live trees with a minimum diameter of 1 inch.

<sup>C</sup> Net volume from a 1-foot high stump to a minimum 4-inch top diameter outside bark in trees with a minimum diameter of 5 inches.

<sup>D</sup> Aboveground oven-dry weight of live trees with a minimum diameter of 1 inch.

Estimates in the table are based on a sample and are therefore subject to sampling error. Sampling errors may be high for some counties.
