Golinda VFD receives $20,000 grant to replace original unit

May 10, 2016 — GOLINDA, Texas — The Golinda VFD recently received a $20,000 grant from Texas A&M Forest Service to purchase a new slip-on unit.

“This new slip-on replaces one of our original units that we got when our department was established in 1983,” Golinda VFD Chief Quincy Lee said. “This unit has two extra attack lines, a 300-gallon water tank and a 10-gallon foam tank.”

A slip-on unit is a complete self-contained firefighting system designed for a pick-up truck or custom built vehicle platform. It is used in wildland firefighting as well as structure and automobile fires.

“In order to raise funds to help with our grant share, we had a chili dinner and manned a fireworks stand,” Chief Lee said.

The department responds to a population of about 1,100. The majority of their response calls come in the summer during hay cutting and the harvesting of other crops.

“The Golinda VFD members are very excited to receive this piece of equipment and to begin training with the newer skid unit,” said Texas A&M Forest Service Regional Fire Coordinator Matthew Schlaefer. “It is a big step up from Golinda VFD’s old unit and will better serve the residents in the Falls County area.”

Texas A&M Forest Service is committed to protecting lives and property through the Rural Volunteer Fire Department Assistance Program, a cost-share program funded by the Texas State Legislature and administered by Texas A&M Forest Service. This program provides funding to rural VFDs for the acquisition of firefighting vehicles, fire and rescue equipment, protective clothing, dry-hydrants, computer systems and firefighter training.
